Flash Flood

Torrential tropical downpours from the remnants of Tropical Storm Charley in the early morning hours caused flash flooding along State Highway 349 between Iraan and Sheffield. Just south of Iraan fast moving waters swept pavement away from this highway and farther south water was flowing over a bridge. The highway was reopened in a limited fashion later that night, but crews continued highway repairs for the next week. Unconfirmed reports of 7 inches of rain were received from citizens of Sheffield

These rains and rains in Crockett County combined to cause flooding on the Pecos River. At Sheffield the river rose to 4 feet above Flood Stage.
